EXPERIENCE

THE NEXUS

Raleigh, NC

Full-Stack Software Engineer

April 2026 - September 2026

- Architected a full-stack Next.js, TypeScript, PostgreSQL, and Supabase platform for registration, scheduling, live match operations, standings, and statistics for competitive SSBU crew leagues, supporting 10+ schools in the debut season.
- Engineered real-time match rooms with confidential double-blind selections, stage striking, score verification, chat, reconnect recovery, and revision-based optimistic concurrency controls.
- Designed transactional workflows and role-based authorization for players, captains, directors, and moderators across roster invitations, school management, tournament registration, match administration, and public league analytics.

PODCAST YOUR WAY

Chapel Hill, NC

Founding Engineer / Full-Stack Software Engineer

June 2025 - March 2026

- Architected and shipped an AI-powered learning platform using Next.js, TypeScript, Supabase, and PostgreSQL, taking the product from 0 to production and supporting 1,000+ users.
- Designed a graph-based curriculum and progress engine with per-user unlock and completion state, powering personalized dashboards, gated lesson flows, and scalable learner-state management.
- Built full-stack AI workflows for podcast title ideation and analysis, cover art generation, lesson guidance, and script drafting.
- Implemented production infrastructure across Supabase Auth, PostgreSQL RLS, RBAC, Stripe checkout, and webhook-driven access updates, plus admin and community tooling for live events and content operations.

KINETIK

Chapel Hill, NC

Data Science Intern

May 2024 - July 2024

- Developed statistical models to identify signals informing go-to-market strategy and success metrics for an IT firm serving 86% of the Forbes Global 50.
- Used Python, SQL, and AWS to ingest and process datasets of 500,000+ records for scalable GTM analytics workflows.

UNC DEPARTMENT OF COMPUTER SCIENCE

Chapel Hill, NC

Full-Stack Software Engineer Intern

January 2024 - May 2024

- Led development of a TA application platform for the Computer Science department and implemented single-table inheritance in SQLAlchemy to manage 200+ TA records.
- Developed features for the CSXL community portal, supporting student engagement and technical community experiences for 2,000+ students.

3C INSTITUTE FOR SOCIAL DEVELOPMENT

Durham, NC

Full-Stack Software Engineer

August 2021 - August 2023

- Designed and implemented a library of 18 interactive social animations in Godot, collaborating with developers, artists, and psychologists.
- Built a web-based reporting tool for real-time engagement statistics, version history, and release notes, while supporting pre-production QA with developers and project leads.

EDUCATION

UNIVERSITY OF NORTH CAROLINA AT CHAPEL HILL

Chapel Hill, NC

B.S. Computer Science; Minor in Entrepreneurship

2025

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, PHP

Frameworks: React, Next.js, Node.js, FastAPI, Laravel, SQLAlchemy, Tailwind CSS
